

George Ward – RIP 6/6/2020

George's wife called me to say that George died on June 6, in Frederick, MD, after prolonged illness. He was just 10 days shy of his 90th birthday. His ashes were interred in the columbarium at his church in Frederick. I believe there will be a memorial service sometime when we are back to normal. I also believe that George started at COMSAT in 1981. He and I traveled together to Ivory Coast, Central, and South America. He was a wonderful facilities engineer.
